Industrial Ecology Laboratory End User License Agreement (EULA) and Service Level Agreement (SLA)

Issued by IELab, 5th May 2017. Please note, this document refers to the source data from which this database was created.

1. Using the Industrial Ecology Virtual Laboratory

Access to the IELab is open to any registered user and free for basic/public data, datafeeds and analytical functionality. Datafeed code is open source (subject to appropriate referencing and citation); optimiser code is compiled and free for research use by registered users. Access to full data, datafeeds and analytical functionality will incur a subscription fee from 2017, depending on the type of usage. Users may request paid access to restricted data on a one-off basis. The fee structure is gradational, depending on the type of user (distinguishing Expert Researchers, Research Community, Public Sector, Consultants, Distributors and Teachers/Trainers). Submission of data to the repository via datafeed is open to all registered users and may lead to the discounting or waiving of subscription fees. Fees are discounted or waived for one year if the user contributes well-structured, fully functional datafeeds. Discounted pricing will be available for lower-middle and low-income countries.

Datafeed authors agree that data produced from their published feeds can be used by other IELab users and that other IELab users may pass on the data to non-IELab users.

Users of IELab data agree to adequately cite datafeed authors for data used from the IELab. An example for such a citation is "Lane, J (2016) Greenhouse gas datafeed, Industrial Ecology Virtual Laboratory, <https://ielab.info>." Repeated failure to adequately cite data feeds or data outputs from IELab will initiate a review of the user(s) and action may be taken according to the Eligibility, Registration, Access, and Termination terms and conditions.
